

TSE incentivised Programme Update For vets

Nothing has changed – you must continue to submit fixed brain **and** fresh spinal cord to your regional lab. Details available on the [TSE surveillance webpage](#).

However if fresh spinal cord is not included as part of the submission there will be **no payment** to the farmer or submitting veterinarian. Similarly, don't submit the whole head.

You will receive the brain histology report from your regional lab as usual.

The Programme needs your submissions, it is important for NZ Trade and Export of animal products. Find all practical steps on the [TSE surveillance webpage](#) :
