

# An upgrade to the laboratory Haematology Analyser

We have upgraded our haematology analyser which unfortunately cannot sample blood from 10 mL EDTA tubes. As such we would ask that you now submit blood for a CBC or ABC in 1.3 mL, 2 mL or 4 mL EDTA tubes. Note that the 4 mL tubes fit in the same vacutainer holder as a 10 mL tube so no change is needed there

## EDTA PURPLE TOP BLOOD TUBE UPDATE

SVS Laboratories new analyser is not compatible with 10mL blood tubes. To help support a change to the smaller tubes SVS are promoting 4mL, 2mL & 1.3mL EDTA purple top tubes.

SVS CODE	DESCRIPTION	PRICE	ORDER QUANTITY
10402	Blood Collection Lav EDTA 1.3ml Each	\$1.09	
12806	Vacutainer Lavender 2ml Each	\$0.43	
1020	Vacutainer Lavender 4ml Each	\$0.43
