	Bovine	Ovine	Caprine	Cervine																																					
Progressive non-responsive nervous disease																																									
Non-responsive metabolic disorder (non-recumbent)																																									
Dairy cattle culled for behavioural reasons																																									
Abnormal gait or stance without obvious injury																																									
Recumbent downer cattle without obvious injury																																									
Progressive non-responsive cases of ill-thrift																																									
(Per)acute pneumonia or aspiration pneumonia																																									

Clinical history: demonstrate the progressive nature of presenting signs (**must be completed** with meaningful information to receive payment)

Declaration

I declare these details are true and accurate, and these samples are not from animals I own, either wholly or in part through partnerships, companies, or other forms of ownership.
